

DJENTLEMEN

Series

Djent as a style has been described as featuring heavily distorted, palm-muted guitar chords alongside virtuoso soloing, and is characterized by rhythmic and technical complexity. Furthermore, the use of seven or eight string guitars is common in the genre, which provides the music its characteristic lower-end, heavier feel.

REGIUS 8 MM QM

Bart Hennephof (TEXTURES)
Jochem Jacobs (TEXTURES)
Acle Kahney (TESSERACT)

In cooperation with djent musicians from Periphery, Textures, Tesseract and Red Seas Fire we've design a very special line of instruments. The Djentlemen Series is based on a Regius model, which clear yet mighty sound perfectly matches the strict tonal criteria of this genre. Those sumptuous neck-thru guitars are a perfect tool for Djent style powerful riffs, jazzy solos and composite chords. Inspiration included.
